Denver County

Dear Denver Elections Division,

I live in the City and County of Denver. I’m asking your office to make it easier for voters to correct a missing or mismatched signature on a mail ballot.

Please put the election deadline, acceptable ID, and paper and secure online submission options together on the ballot correction page and in voter notices. Include the county help number and explain how voters can confirm that their correction was accepted. Please make the instructions available in accessible formats and in the languages your office serves.

After each canvass, please publish or link a county summary of mail ballots flagged for a signature problem, corrected and counted, or unresolved. A date and a short definition for each count would help residents interpret the figures.

Thank you for helping eligible voters resolve ballot problems and understand how their ballots were handled.

Sincerely,

Signature

Fact check

Colorado’s HB26-1113 amended C.R.S. § 1-7.5-107.3 to require faster delivery when the county misses the deadline to send a signature notice and form. Denver’s Elections Division administers mail-ballot verification and correction. Checked November 10, 2026.
